

We are...

A prominent engineering company who serves comprehensive solutions in Engineering design, Steel product manufacturing & complex installations. Our primary focus is on precision, quality, and innovation, as we strive to deliver customized engineering services that meet the diverse needs of our clients. With a highly skilled team of professionals and cutting-edge technology at our disposal, we are committed to achieving exceptional results and fostering long-term partnerships with our clients.

INCROLUX stands as a trusted engineering company, offering a **comprehensive range of services that encompass supply chain management, product manufacturing, inventory solutions, quality control, and project management.** What sets us apart in the industry is our unwavering commitment to precision, quality, and utmost customer satisfaction.

We take great pride in understanding and fulfilling your specific needs, tailoring our solutions to provide a customized approach that yields exceptional results. Our team of highly skilled professionals is dedicated to ensuring your satisfaction at every stage of our collaboration.

Capabilities

Extended Engineering Design & Drafting

our team comprises experienced engineers who specialize in the conceptualization, prototyping, and development of innovative designs. We leverage the latest software and design tools to offer comprehensive design services across various industries, ensuring that our solutions are functional, efficient, and visually pleasing.

Extended Manufacturing

our suite of manufacturing services prioritizes transparency and productivity, ensuring that you can rely on the timely delivery of high-quality products that meet your specifications. By leveraging our distributed manufacturing services, you can unlock operational efficiencies and expand your reach without limitations. Currently we are operating in heavy fabrication, machine components, casting, forging segments.

Extended Installation Partner

Our experienced team is providing seamless installation solutions for a wide range of products and systems. We are strongly emphasis on precision, efficiency, and customer satisfaction to ensure that products are installed and integrated effectively.

Collaboration...

Our commitment extends to actively seeking collaborations and partnerships with esteemed industry leaders, reliable suppliers, and renowned research institutions. Through these strategic alliances, we fortify our capabilities, broaden our expertise, and remain at the forefront of technological advancements. These collaborative efforts empower us to offer our clients comprehensive and state-of-the-art engineering solutions that meet their evolving needs.

We eagerly anticipate the opportunity to work closely with you, leveraging our industry expertise to support your business objectives and contribute to your overall success. Together, we can accomplish remarkable things.

Thank you!
